

Butyl Tape

Installation Instructions

Butyl Tape is a polyisobutylene (PIB) based sealing tape.

If you are unsure about any details within this method statement, please email tech@pfc-corofil.com

General

- Do not apply tape if ambient temperatures are below 4°C or above 30°C.
- All surfaces should be clean, dry, grease free and free from all bond breaking contaminants.
- Unwind the tape and lightly press into position leaving the release paper in place.
- On forming the joint, remove the release paper and push the tape firmly in place, applying pressure along the length of the joint.

Health & Safety Instructions

Please refer to SDBUTYL

Other Information

Please ensure the product(s) described within this method statement have been tested in, and are suitable for your application.
