

SmartAir Sterilisers

Provide a Clean Air Zone

SmartAir controls and destroys harmful bacteria and viruses in the air and on surfaces 24 hours a day, 365 days a year with no ongoing user maintenance required.

SmartAir sterilisers can be placed on any wall or ceiling and sized to suit the room air volume.

The mains power supply required is less than 13 Watts so can be powered from a lighting circuit via a fused spur. The output of the tube will be determined by the size of the area to be treated along with any other factors such as air circulating or air removal units etc.

Our trained team will be able to advise on which unit is best suited to your environment.

SmartAir Sterilisers

ELIMINATE OFFENSIVE ODOURS & CONTROL INFECTIONS

Businesses that can demonstrate their commitment to providing a hygienic environment for staff and customers are likely to do better when they emerge from lockdown than those that do not.

The sterilising effect of the sun and UV light on viruses, bacteria and odours are well known.

SmartAir Sterilisers are designed to recreate and enhance this process by increasing the activated oxygen effect and creating a plasma which further results in the breaking down the 'envelope' on viruses, destroying them rendering them harmless.

Self-adhesive 'Clean Air Zone' decals are provided with every unit so you can let customers know you are making every effort to ensure their safety.

SmartAir "technology has been tested against MS-2 coliphage (a surrogate for Norovirus) and achieved significant reductions in counts in both air samples and on surfaces. MS-2 is a non-enveloped virus that is more difficult to kill than the lipid-enveloped SARS-CoV-2.

SARS-CoV-2 belongs to the same group of viruses that cause colds and influenza.

The use of SmartAir units in call centres and offices at an NHS Trust has been shown to reduce the incidence of illness-related absences; particularly reported cases of colds, coughs and influenza, as well as reducing other chest and respiratory problems."

SmartAir Sterilisers

Provide a Clean Air Zone

- The SmartAir technology is capable of disinfecting and sanitising air and surfaces even in the presence of humans
- The room, the furniture and the surfaces are disinfected 24 hours a day 365 days per year
- The chemical-free solutions enable Zero downtime and no application costs
- Reduces absenteeism from illness and cases of contagious infection rates
- Keeps the area safe, clean, fresh and virus free
- Removes harmful and toxic fumes from poorly ventilated rooms
