Gymnasiums  
Offices  
Kitchens  
Food prep areas  
Care Homes  
Lounges  
Corridors  
Receptions  
Waiting Rooms  
Open Plan Offices  
Nurseries  
Classrooms

## The Multi Smart Range

Lifts hygiene standards to a level impossible with traditional cleaning alone

### Remove odours, controls infection and improves hygiene

In enclosed spaces, lingering unpleasant odours are an embarrassing problem. Airborne microorganisms create offensive odours, spread infections and compromise hygiene standards, bacteria breed so quickly they cannot be cleared with traditional cleaning. Masking odours can create a more unpleasant environment.

The MultiSmart range is completely safe for use in areas of continuous occupation.

- Fan operation distributes cleaning air
- Annual lamp change maintains performance
- Robust vandal resistant Aluminium casing
- Wall or ceiling mountable on four screws
- Plugin or quickly wired into a fused spur

### Reduces harmful viruses

- Circulates fresh clean air • Breaks down unwanted bacteria
- Attacks odours at their source • Removes unhealthy microbes from the air
- Makes every room smell freshly cleaned • Maintains sanitised surfaces
- Stops mould and fungi growth • Clears smelly compounds in the air 24/7

For Maximum odour levels and infection control, we have the MSR-20, MSR-40, MSR-60, & MSR-80 units.

For areas greater than 80m<sup>2</sup> we advise 2 units or a combination of 2 models depending on the layout.
