Safe Transportation

PERFECT FOR USE
IN VEHICLES TO
CONTROL ODOURS
& INFECTIONS:

- Laundry collection
- Waste and Recycling
- Medical supply
- Food transport
- Professional movers
- Multidrop vehicles
- Long-range hauliers
- Tractors
- Buses and minibuses
- Trains
- Taxis
- Shared vehicles

The Smart Vehicle Range

Odour control on the move, lifting vehicle hygiene to a new level

Maintain a healthy, clean, sanitised vehicle.

Working vehicles must cope with a lot, the same vehicle may be used for a variety of loads creating problems with cross-contamination. Maintaining an odour free, clean and infection controlled environment can be a constant challenge.

With busy schedules and quick turnarounds, the time allowed for vehicle cleaning is always tight with deep cleaning requiring vehicles off the road.

SmartAir uses specialist techniques proven to target microorganisms. Odour control is equally important, unpleasant odours can easily transfer to loads being transported.

- Prevents cross-contamination between loads
- Lifts hygiene levels
- Extend clean cycle, reducing vehicle downtime
- Removes embarrassing odours by treating the root cause
- Targets bacteria and viruses in the air and on surfaces

SmartAir products have always been supplied with guaranteed odour control across multiple industries.

- Fan operation distributes air throughout the vehicle
- Annual lamp change maintains performance
- Robust vandal resistant Aluminium casing
- Horizontal or vertical mounting
- Vibration absorbing mounting plate
- No filters to change
- Guaranteed odour control
- 12- or 24-volt power options are available

* Certain bacteria such as E Coli can replicate every 20 minutes, which could in theory leave you with 16.7 million in 8 hours. What we are highlighting is that bacteria breed very quickly and cannot be controlled with traditional methods.
